

### TRUSSES,

With and without Electrical Attachments, suited to every form of Hernia.

### THE COMPLEXION.

DR. ELLISON also makes the treatment of Facial Blemishes a special study and can refer you to ladies in this city who he has done work for the removal of such blemishes as Moth Patches, Freckles, Pimples, Blackheads, Moles, Unusually Wrinkles, Superfluous Growth of Hair on the Face, etc., etc. All such blemishes permanently removed, leaving no scar or trace behind.

Beauty is admirable, be it in landscape, picture, bird, flower or woman. It is the conqueror of all: the ever yet to be attained goal of the iron-moulded mind, full proof against her power. The complexion may be beautified by proper treatment. The skin is as amenable to treatment as any internal organ. Ladies afflicted with any form of complaint peculiar to their sex, will find permanent and immediate relief by a new and scientific method of treating these troubles. Procrastination is the thief that robs us of golden moments. Do not longer delay the proper treatment, but take a thorough course of electrical treatment and be made happy again in the enjoyment of returned health. You will find this treatment pleasant and satisfactory.

### DR. ELLISON'S

### Air Mediator and Injector.

For the Treatment of Catarrhal Affections, Bronchitis, Hay Fever, Asthma, Diphtheria, Croup and Lung Troubles.

See the Doctor's special offer in to-day's Tribune, on page 8, also on last page of yesterday's Evening Times.

### DR. W. L. ELLISON, Permanently Located in Salt Lake City,

Making a specialty of Electrical Treatment, treating all forms of Chronic and Nervous Diseases by the latest and most approved methods of Electrotherapy. Also dealer in all kinds of apparatus for Physical Deformities, Trusses, Supporters, Braces, Elastic Stockings, Artificial Limbs, Family Batteries, Invalid Chairs, Electrical Appliances, etc., etc.

Office, Commercial Block.

Hours, 9 to 12 a. m.; 2 to 5 p. m., and 6:30 to 7:30 p. m.

TESTIMONIALS from the representative people of Salt Lake can be seen at the Doctor's office, testifying to the efficacy of his treatment. Experiments by scientists are constantly and surely proving electricity to be the great motive power of creation. It is the most powerful chemical agent, as well as the basis of chemical action. If we turn to man and investigate the secret workings of his nature, we find that he is but an epitome of the universe. The chemical properties of the various substances in existence, and in the most exact proportions, and congregated and concentrated in him and form and constitute the very elements of his being. In the composition of his body are involved the mineral and vegetable substances of the globe, even from the grossest matter step by step up to the most refined and fine, and lastly to finish this masterpiece of creation, the brain is invested with a living spirit. This incomprehensible spirit, like an enthroned deity, presides over and governs through ANIMAL ELECTRICITY. MOTIVE POWER, as its agent, all the involuntary motions of life to proceed in their destined course. Electricity is the power which, by acting through self-moving powers cause all the involuntary functions of life to proceed in their destined course. Electricity is the power which, by acting through the nerve forces, moves the blood, and is the agent by which the mind through these nerves controls the muscles and produces motion. When the electrical polarities of the nervous system are unbalanced, diseases ensue; when they are equalized throughout the nervous system, the blood will also be equalized in the circulation, and the natural result is health. Since all diseased conditions of the system originate in the disturbance of these elements of our nature, a corresponding element is needed to restore the equilibrium. Electricity is the nearest approximation to the mind element, or the nerve-fluid, so we see why it is so reliable when wisely applied.

### DR. ELLISON'S ELECTRIC BATTERY.

Our Electric Battery, built after our own plan, is of the very finest in use, imparting the highest elements and different modifications of electricity, without producing the shocks and unpleasant sensations which are produced by small inferior batteries that emit only intense and inferior currents. There is as much difference in the qualities of currents produced by a good or an inferior battery as there is in the merits of the different medical compounds. These who have been disappointed in the use of electricity produced from batteries of an inferior quality should be more judiciously guided by the experience they have had with the inferior than to condemn all medicines as worthless because some have failed on account of inferior quality. We kindly invite all to visit our office and investigate for themselves.

### SPECIAL NOTICE.

Man advances in proportion as he mingles thought with the special work that he performs. For years we have made the study and practice of Electrical Treatment a specialty. During this period we have gone steadily on, confining ourselves to the practical uses of Electricity, showing its capabilities, and demonstrating in many thousands of cases its great power as a curative agent. As our aim has been to benefit the suffering, it is a source of gratification to know that this system is becoming widely and popularly known, and that the discerning and thinking public appreciate this department of Electrical science. Success in a treatment is a test of science and skill. The vital forces are gradually but surely giving way, and our eyes are turned toward the tomb. It is not those who chatter about theories and dogmas that bring back health to the sufferer, but those whose years are given to a study of the science of life.

### DR. ELLISON'S ELECTRIC CHAIR.

Our Electric Chair is complete in all its arrangements. By it we are enabled to give the most satisfactory electrical treatment, being so constructed with electrodes that a current can be given to any portion of the body desired.

## FINANCE AND MINING

### Lead Remains Steady, but Silver Declines.

### BIG ORE AND BULLION OUTPUT

The Week's Bank Clearings Show a Decrease—Business at Home and Abroad—News From Many Mines.

The presence in this city of the Wizard of Wall street during a portion of the week excited considerable interest among our business men. Not because Jay Gould is the possessor of a couple of hundred millions or so, but rather that he is at the head and front of one of the greatest railway systems of the world, and in a position to do much for the weal of the city, should he so desire. The one great trouble from which the business men of this city are suffering is discrimination in freight rates and it was finally imagined that the magnate might be interested in the cause with good effect. That he did listen very patiently to what a number of our leading citizens had to say to him in that regard; that he did crawl out of his shell of reserve long enough for the owners of mines and business houses to rub up against him, was true; but that he made any promises the carrying out of which will inure to the benefit of our merchants and mine owners is yet to be learned. There are those, however, who are pleased to believe that much good will come of Jay Gould's visit to Salt Lake; it is to be hoped their predictions will be fulfilled.

Business generally during the week just closed has held its own fairly; some report a slight improvement; others insist that there has been no change. Taking every thing into consideration it may be safely stated, we think, that a slight improvement has taken place, and that the prospects are better than they have been for some time. City collections are slow and remittances from the country do not come in with such frequency as might be desired.

### Salt Lake Clearing House.

Yesterday's clearings, \$361,182; same day last year, \$304,182. Week's clearings, \$1,607,128; same week last year, \$1,763,530.

### Lead and Silver.

Lead has been steady during the week at \$4.40. Silver has shown a decided downward tendency; opening at 93 1/2, it closed last evening at 92 1/2.

### The Crops of Utah.

It has been often said, but will bear reiterating, that never before in the history of Utah, have the crops been so abundant. Especially is this true of the small grains and cereals. Sanpete, Cache, Utah, and the various other valleys of Utah are fairly overladen with wheat, oats, barley, etc., but it is feared that in some sections grain will be left standing too long—owing to a scarcity of the proper kind of farm help—and there will be some damage done by the early fall rains.

### A Spirit of Improvement.

"The spirit of improvement in the New York stock market," writes Henry Clews, "is still maintained. The intelligence of even a larger crop of wheat than the previous large estimates had indicated, and the prospects of the corn crop also have exhibited a steady improvement. The tendency of information from Great Britain and the continent has been to dispel the

illusions about the supposed desperate condition of trans-Atlantic financiers. At London there is a distinct improvement of feeling, and even a ray of hope begins to dawn upon Argentine finance and the much depreciated securities of that country have, within the past week, shown a notable recovery. The favorable assurances recently expressed by the Bank of England have also had a reassuring effect. Putting these and several other minor factors together, it cannot be denied that they amount to a substantial improvement in the situation, and coming as they have, in a large measure unexpected, it is not surprising that they have changed the temper of the market and stimulated speculation. It is unwise to assume, however, that the present boom is likely to develop into a considerable further advance in prices. It would be only common prudence to let the market stand further trial before trusting it confidently, and especially as London is giving it no support, but selling out on our boom."

### Smelters or Payson.

The Payson Enterprise announces the purchase by Salt Lake capitalists of twenty-eight acres of land at the crossing of the Tintic range and Union Pacific railways, just west of the town, and infers that the land is to be used for the erection of smelters, which will probably be built this fall. While the writer does not place much faith in the statement, it is to be hoped that the surmise of the Enterprise is correct.

### At the Banks.

The ore and bullion shipments made by the various banks of the city for the week ending August 29, 1891, amounted to \$221,967.72, as compared with \$301,487.03, for the week previous. They were reported as follows:

By McCornick & Co.:	
Silver and lead ore.....	\$ 53,500 00
Hammer bullion.....	16,625 00
Total.....	\$ 64,125 00
By Wells, Fargo & Co.:	
Bullion.....	\$ 43,098 56
Ore.....	30,717 28
Total.....	\$ 73,815 84
By T. B. Jones & Co.:	
Ore.....	\$ 34,030 00
Fine bars.....	18,000 00
Total.....	\$ 52,030 00
By Union National Bank:	
Alloy bullion.....	\$ 28,215 76
Total.....	\$ 28,215 76
Total shipments for the week.....	\$221,967 72

### NEWS FROM THE MINES.

Mr. Hansauer reports the week just closed as a very fair one. All the big camps were heard from, and there were several shipments from Nevada, Idaho, and other regions surrounding.

### From Tintic.

The Sioux had its regular shipment of one carload.

### The Swansea.

The old Swansea is a shipper.

### South Swansea.

The shaft is being timbered.

### The Rising Sun.

Alex Benham has struck good ore in a new shaft recently started on the Rising Sun mine.—Chief.

### The Hermia.

Civil Engineer Joseph went to Eureka last week to survey the Hermia.

### Silver Moon.

The Silver Moon is "rolling on" in good shape with four men at work in the mine. C. N. Roe is still in Silver city watching developments.—Chief.

### The Utah Chief.

The Utah Chief, owned by W. C. B. Allen, of this city, is said to be looking unusually well.

### Martha Washington.

Twelve tons were shipped last week.

### Silver Spar.

Pierce Bros. have leased the Silver Spar mine and are taking out good pay shipping ore.—Chief.

### The Sunbeam.

Shipments were made during the week.

### Silver Belt.

James Larson and M. Gunderson are down 175 feet on the Silver Belt group, adjoining the Albany Consolidated on the south, and have a two-foot vein, containing low grade ore. They think they are on the Swansea vein. The ground is patented.—Chief.

### The Governor.

Eleven tons came from the Governor.

### The Germania.

Three hundred and fifteen tons came from the Germania.

### The Carolina.

Nearly one hundred tons came from the Carolina.

### Centennial-Eureka.

There were the usual ship shipments.

### The Mammoth.

An order has been placed with Fraser & Chalmers by the Mammoth company for a new drill plant. This will consist of a double compressor having cylinders 12x30 inches and a pair of Corliss engines to run it. The dimensions of the cylinders of the engines will be the same as those of the compressor. This plant will have the power to run twenty drills at sea level and it can be worked single or double as desired. The entire weight of the machinery will exceed 100,000 pounds, and with the new boiler put in by the company last summer, and the changes made in the arrangements, when the invoice now ordered arrives it will give the mine an almost perfect equipment, sufficient for all requirements until a new shaft shall be decided on. When the order was given the instructions went with it to make and ship the plant as soon as possible.—Miner.

### The Independence Group.

Schmidt Brothers are doing quite extensive work on the Independence group.

### The Eagle.

The Eagle mine is being pushed to completion. When the engine and boilers are in place the Eagle will surprise some people with the amount of ore it will ship. This is one of the best properties in Tintic. Tintic Miner.

### North Eureka.

Good-looking rock is being hoisted daily. The assays, however, are not given.

### The Excelsior.

A small shipment came in.

### From Bingham.

The Last Chance.

Thirty-two tons went 30 lead 50 silver, and 2 gold.

### The Benton.

Twenty-six tons came from the Benton.

### The Tiawakee.

Thirty tons showed 54 silver and 1 1/2 gold.

### The Petro.

A recent strike in the Petro, shows ore going 30 lead, 60 silver and 35 gold.

### Yosemite No. 1.

From the most extensive of the Yosemite No. 1 there comes ore going 43 lead and 11 silver.

### The Highland.

Two hundred and fifty tons represented the Highland.

### The Brooklyn.

Two hundred tons of the usual grade of ore came in.

### South Galena.

One hundred tons came from this mine.

### The Spanish.

Forty tons represented the Spanish.

### The Delaware.

Twenty tons came in.

### The Castle.

One carload went 43 lead and 11 silver.

### Silver Gauntlet.

One carload of second-class ore was shipped.

### From Park City.

The usual shipments came in. The dividend of 40 cents is payable Tuesday.

### The Daily.

The regular dividend of 25 cents is payable Tuesday.

### The Anchor.

Two hundred and fifty tons of concentrates came in.

### The Mayflower.

The Mayflower is again a shipper.

### The Wedge.

Forty tons came from the Wedge.

### From Stockton.

Eighty-four tons represented this property.

### Monarch and Northern Light.

One carload represented this property.

### The Backhorn.

One carload came from the Stockton Backhorn.

### The Bullion.

One carload showed 5 lead and 16 silver.

### From American Fork.

North Star.

A shipment showed 38 lead and 27 silver.

### From Dagway.

Gilson's latest shipment showed 190 silver and 1 oz. gold.

### From Fish Springs.

The Emma.

Emma miners report a very good strike in the No. 2 shaft.

### The Utah.

A shipment was made during the week.

The ore went 14 lead and 90 silver.

### The Wind Cat.

Crismon Brothers have encouraging advices from the Wind Cat.

### Utah No. 2.

The ore now being cut is said to be of very high grade.

### From Frisco.

The Horn Silver.

The Horn Silver had the usual heavy output.

### ROWLAND HALL.

A select boarding school for girls. A new and convenient school building has been erected. A full and complete corps of teachers. Excellent musical advantages under the direction of Miss Watson. A resident teacher of French and German. Pupils will be taught to speak these languages as well as read them. Special teachers also of the Spanish language, art, violin and mandolin and guitar. The preparatory department is under the direction of Miss C. E. Hayden, under St. Mark's cathedral.

### DELICIOUS COLD BEVERAGES.

The concoctions served to the thirsty and warm at the Occidental are delicious, pure and superior. First-class wines, liquors, beers, ales and cigars. Family supplies a specialty.

### FLOWERS OF ALL KINDS.

At Reading's, under Utah National bank.

## \$500 Reward!

We will pay the above reward for any case of Liver Complaint, Dyspepsia, Acid Stomach, Indigestion, Constipation or Catarrhes we examine and with "Wells' Vegetable Liver Pills," when the directions are strictly complied with. They are purely vegetable, and never fail to give satisfaction. Sugar Coated. Beware of cheap imitations. The genuine manufactured only by THE JOHNSON & CO. DRUG CO., CHICAGO, ILL.

## Leading Questions Answered!

Are you Nervous? Restless and Sleepless at Night? Get up with the Headache? Is your Brain Overworked? Do you feel Mentally Thrift? Do you want a General Tonic and Builder up?
